

# LED Lightning and Smart City

## Smart City Solution-iLCS®

The Solution: Smart city is defined as urban innovation, combining data and technology to create city's operational efficiency, improve infrastructure for developing countries and raise urban living standards. iLCS® helps municipalities to enhance communal public safety, security and surveillance demand.

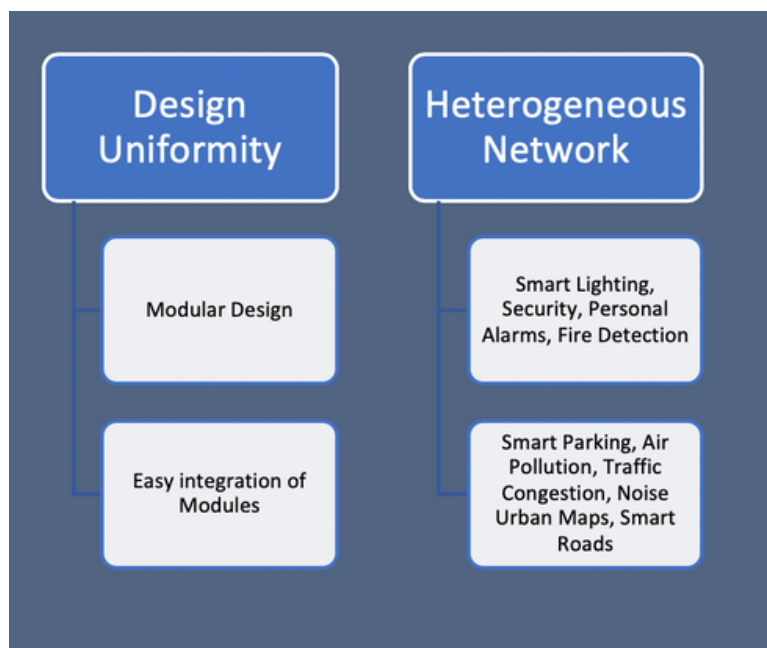

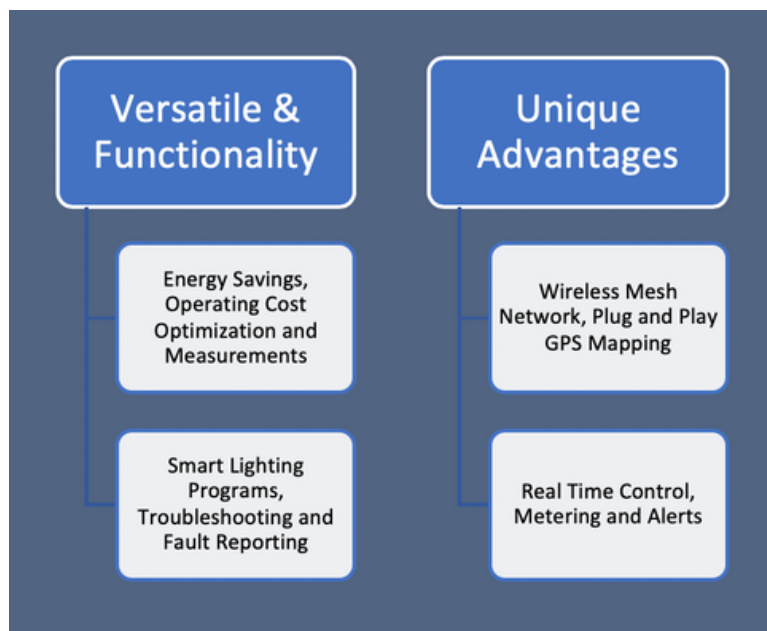

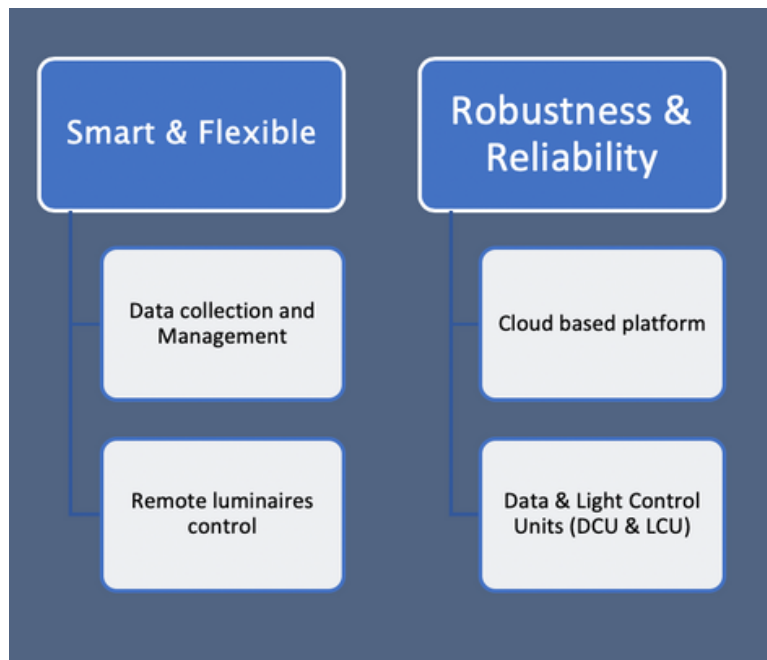

This solution is offered on a customer project basis in collaboration with our lighting manufacturing partner. Our team can discuss the customer requirements to ensure we offer a solution that meets your requirements.

Benefits:

The systems key benefits are Social, Environmental and Economic:

- Enhance Safety and Security
- Safeguard Assets and Properties
- Surveillance Demand
- Traffic Flow Management
- Energy Efficiency
- Communal Outdoor Activities

## TRIMAX LED SMART LIGHT

The Trimax solution is a masterpiece of combined technologies with artificial intelligence and future proof design. It is not just a luminaire anymore.

Trimax represents a multifunctional hub for outdoor related wireless sensor network applications, security demands and public services.

An innovative modular design provides unique thermal management whereby each module is thermally isolated, R1, R2 & R3.

### ICLS

built-in remote control management system

### R3 - SECURITY SOLUTION-

iPublic Security Management built

### R2 - CONNECT SOLUTION

Public WiFi Access

### R1 - SMART SOLUTION

Smart Lighting Elements

No one in the Botswana market offers such an innovative solution
